

Helping photographers understand the unique perspectives that assist in the discovery of their capabilities, while enabling a deeper connection with themselves and others through creative expression.

Join professional landscape photographer Nic Stover as he leads attendees on a journey through the true spirit of the United States, the Western US. The “West” has 36 National Parks spread out over 11 states, with countless State Parks, and endless amounts of Wilderness. It is the true essence of nature and beauty in its most protected and wild forms.

Through the eyes of the visionaries that either discovered or found the words to describe these lands we will journey through the West through the words of Ed Abbey, Lewis & Clark, and John Muir. Nic has been fortunate to travel camera in hand to many of these iconic and lesser-known places that inspired the thoughts and exploration from these pioneers.

Through our time together he will share his experiences from the following locations.

- Some of the amazing National Parks like: Death Valley, Channel Islands, Yosemite, Pinnacles, Kings Canyon / Sequoia, Lassen, Crater Lake, Olympic, Mount Rainier, Grand Teton, Great Basin, Capitol Reef, Zion, and Bryce
- Off the beaten path (literally) locations in the High Sierra Mountains and the odd and obscure in places like the Ancient Bristlecone Pine, Trona Pinnacles.
- The remoteness and beauty of Iconic Highway 1 along the Central Coast special spots like Big Sur, Montana DeOro, Pirates Cove, and Oceano Dunes.
- An in-depth exploration of the Desert Southwest visiting 25 locations many have never heard of like White Pocket, the Wave, Coyote Gulch, along with places like Antelope Canyon, Lake Powell, and others.

Watch to see some of Nic's favorite locales to photograph, along with a few tips to polish up your own photography skills the next time you're exploring the outdoors. You'll be sure to discover new places you'll want to explore — and some secret gems!

Nic will also talk about how to plan your images using tools like PhotoPills and how he discovers these places along with 3 simple ways to immediately take better images. Join us!
